THINKING OF ADOPTING A CAT?

Cats are lovable, charming pets that offer endless fun and entertainment. So, if you're thinking of adopting a cat, keep in mind these tips on how to keep him healthy and happy.

- ♥ Feed them good, nutritious food regularly, at least once a day.
- ♥ Cats need plenty of cool, clean, fresh water. Adult cats do NOT need milk, which might make them fat and give them diarrhea.
- ♥ Do NOT automatically have your cat declawed. Declawing has been compared to removing your fingernails. Would you like it? To prevent your cat from scratching or tearing your furniture, trim his claws regularly and provide him with a small rug or scratching post. Verbal scolding can also work wonders.
- ♥ Unlike dogs, cats do NOT need to go outside. Cats are almost always naturally housebroken and will use a litter box even at an early age. Allowed outside alone, cats often get lost or hurt and sometimes get killed. Also, don't leave your cat alone in a room with an open window.
- ♥ Make sure your cat always wears identification. Provide the animal with a comfortable, expandable collar and an attached identification tag with your name, address and phone number on it.
- ♥ Unlike most dogs, cats do NOT need to be bathed. A healthy cat keeps himself clean and well groomed.
- ♥ Make sure your cat gets good veterinary care, including all necessary examinations and shots.
- ♥ Have your cat spayed or neutered by a veterinarian as soon as possible. Your cat will enjoy a longer, healthier life, there'll be fewer strays on the streets and you'll be spared the hassles of a cat in heat.
- ♥ Give your cat plenty of love and affection. Though cats are more independent than dogs, they thrive on your companionship.
